### **Handicap Program**

The purpose of the USGA Handicap System is to make the game of golf more enjoyable by enabling players of differing abilities to compete on an equitable basis. The system provides a fair course handicap for each player, regardless of ability and adjusts a player’s Handicap Index up or down as the player’s game changes. All scores for handicap purposes, including tournament scores, are subject to the application of Equitable Stroke Control. This mandatory procedure reduces high hole scores for handicap purposes in order to make handicaps more representative of a player’s potential ability. Equitable Stroke Control is used when a player’s actual or most likely score exceeds a maximum number, based on the table below, for the player’s course handicap from the tees played.

<u>Course Handicap</u>	<u>Maximum Number on Any Hole</u>
9 or less	Double Bogey
10 through 19	7
20 through 29	8
30 through 39	9
40 or more	10
